Model Commuter

A TRUE ECONOMIC AND ECOLOGICAL ELECTRIC VEHICLE

According to Avantier's vision, a battery-powered electric car with a compact body design is very economic and ecological and it will give us a perfect option to move greater agility, including for the last-mile delivery as it has a plenty of storage space.

A true E-vehicle can really reduce air pollution in city centers and avoid the need for traffic restrictions and parking space limitation.

Offering a perfect e-mobility and affordable car to our customers is always our mission.

The Avantier Commuter is a perfect city car for short trips in the urban environment. Thanks to its low purchase price and maintenance costs, it is also one of the most economic small cars on the market.
