common.units.combined	11,7 L/100km

LEGAL

The figures for fuel and energy consumption were determined according to the new Worldwide Harmonised Light Vehicle Test Procedure (WLTP). For CO2 emissions, two figures are shown: one figure according to the new WLTP test and one figure which was translated back to the old NEDC equivalent. Until 6th April 2020, only the NEDC equivalent CO2 figure will be used to calculate the Vehicle Excise Duty in the UK. Figures are for comparison purposes and may not reflect real life driving results which depend on a number of factors including the starting charge of the battery, accessories fitted (post registration), variations in weather, driving styles and vehicle load. For plug-in hybrid vehicles they were obtained using a combination of battery power and fuel, for battery electric vehicles after the battery had been fully charged. Plug-in hybrid and battery electric vehicles require mains electricity for charging. More information on the WLTP test procedure can be found here: <https://www.bmw.co.uk/discover-bmw/technology/efficientdynamics/consumption-and-emissions>

[1] The recommended on the road cash price includes delivery, BMW Emergency Service, number plates, first registration fee and vehicle excise duty. Where applicable, government grants and subsidies are not included in the on the road cash price displayed. All of the content has been put together with the greatest possible care. Despite this, BMW (UK) Ltd cannot be held liable for the information and prices contained being free of errors, correct, and accurate. No guarantee can be provided nor liability accepted.

[2] The fuel consumption given in miles per gallon.

[3] All figures were determined according to a new test (WLTP). The CO2 figures were translated back to the outgoing test (NEDC) and will be used to calculate vehicle tax on first registration. All figures were determined according to a new test (WLTP). The CO2 figures were translated back to the outgoing test (NEDC) and will be used to calculate vehicle tax on first registration. Only compare fuel consumption, CO2 and electric range figures with other cars tested to the same technical procedure.

A guide on fuel economy and CO2 emissions which contains data for all new passenger car models is available at any point of sale free of charge. For further information you can also visit: <https://www.gov.uk/co2-and-vehicle-tax-tools>
